About Wayamba Lanka

Wayamba Lanka Coco (Pvt) Ltd has more than 20 years experience in coco peat and coconut husk chips industry. We manufacture 100% natural, organic & eco friendly coir products and compost to the horticulture and floriculture.

The modern technology and machineries along with high quality materials guarantee a premium high quality product while ensuring delivery targets.

Our factory base in the heart of coconut triangle region in Sri Lanka and it ensures the continuous production through out the year.

Wayamba Lanka highly focus on customer satisfaction and it is our moto. We bear GMP certificate and its ensures products are consistently produce and controlled according to quality standards.

Raw Material

Coconut husk and the coco peat are raw materials of our product. It is 100% natural and organic. Always we use high quality raw materials and it enhances quality level of products.

Coconut Husk Chips

We produce 4 different grades of husk chips.

S	12 - 18 mm
SS	6 - 12 mm
SSS	3 - 6 mm
SSSS	1 - 3 mm

The various coco chips sizes provide an excellent means of balancing air to water ratio for different applications.

Coco peat

Wayamba Lanka produces two different types of coco peat.

Red peat

The washed red peat EC level less than 500; and fine removed. We are using high quality red peat which guarantees maximum expansion when watering.

Black peat

The speciality of black peat is EC level less than 100. The black peat making process is normally difficult, but it gives high result for your growing. It improves the water circulation and gives a better root colonization.

The Process

Collecting Pith and Husk

We get peat and the husk from our own fiber factories and suppliers around the factory. We store them completely free from seeds and weeds.

Washing

Raw materials add to the tanks and wash with fresh water in 3 times to reduce the EC level.

Sieving

Wash raw materials put to the mesh and its helps to remove fine and catagorize to sizes.

Compacting and packaging

Base on customer requirements compress the bales and pack per as customer specifications.

Product Portfolio

- Grow bags
- 5 kg bales
- 25 kg bales
- Briquets
- 1000 kg bales
- 500 kg bales
- Coir Disk
- Compost

Grow Bags

Grow bags are packed in high density, co-extruded plastic bags. Which are UV treated at least minimum of 2 years. Another advantage is that they are easy to transport before re-hydration and can be stocked for month as they are compressed dry.

Our grow bag range has the several sizes. We can custom grow bags as per the size and requirement of the customers.

5 kg Bales

Coco peat and coconut husk chips washed dried and compressed in to 5 kg blocks for your convenience. Wayamba Lanka has several mixtures of 5 kg blocks and according to customer requirements can change the mixture.

25 kg Blocks

We produce 25 kg blocks using red coco peat, black coco peat and coconut husk chips. The washed and dried material compressed to 25 kg bales. The economical benefit is the advantage of 25 kg bales.
